

# Building a data visualization management model for big health data at community health service stations by POWER BI

- Mei-Yu LEE R.N.
- MacKay Memorial Hospital
- 2024.11.8

30<sup>TH</sup> INTERNATIONAL CONFERENCE ON HEALTH PROMOTING HOSPITALS AND HEALTH SERVICES, HIROSHIMA, JAPAN | NOVEMBER 6-8, 2024

International Network of Health Promoting Hospitals & Health Services

# TAIWAN

- Capital: Taipei 25°02'N 121°38'E
- Population: 2022 estimate 23.2 million
- GDP (PPP): 2021 estimate Total \$1.40 trillion, Per capita \$59,398
- GDP (nominal): 2021 estimate Total US\$ 775 billion, Per capita \$33,011
- Life expectancy: 77 years (men) 84 years (women)
- Area Total 36,193 km2 (13,974 sq mi) (136th)

# **MMH In Brief**

- Taipei and Danshui together qualify as a Medical Center with the longest history in Taiwan
- A health network through northern, western and eastern of Taiwan
- Intradepartmental cooperation to provide integrated, comprehensive care.
- Dedicated to conducting innovative research for practical clinical application
- Upholds a mission to train future medical professionals.

# **Background/Goals** - Distribution of Health Stations

# **Background/Goals**<sub>2</sub>- Develop representative indicators and daily management indicators

Physiological measurement (including BMI, abdominal waist and blood pressure).

#### Method<sub>(1)</sub> Followed by the steps below to develop community health promotion indicators:

1.To visualize the results of service volume, gender, age, BMI, waistline and blood pressure by **Power BI**.

# Method<sub>(2)</sub>

2.Develop daily management indicators: Recording the **service volumes** in the community.

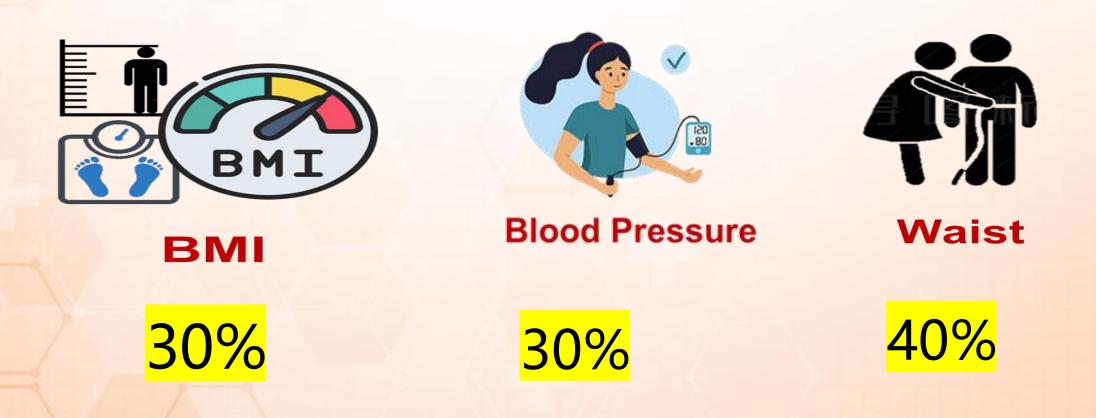

# Method (3)

#### **3.Establish health promotion indicators for community residents:**

a. Outcome indicators:

The average improvement rates of people's BMI, blood pressure, and waistline increased by both 30%, and 40%.

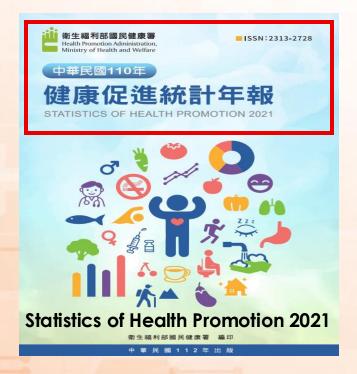

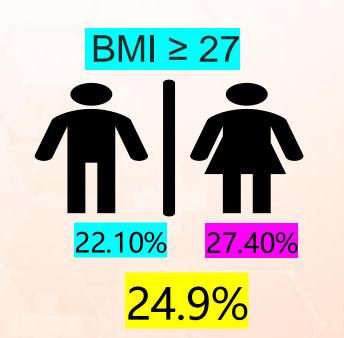

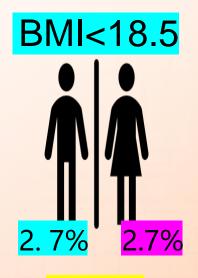

#### Method (4) :

#### b. Indicators for peer comparison:

I. The proportion of people over 65 years old with a BMI  $\ge 27$  is less than or equal to 24.9%. II. The proportion of people over 65 years old with a BMI < 18.5 is less than or equal to 2.7%

# **Result**<sub>(1)</sub>

Nursing counseling and health check

Health and Nutrition lectures

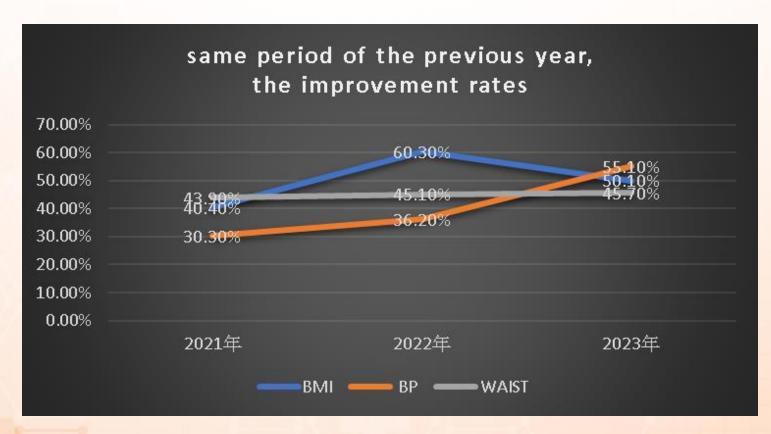

Physical fitness courses

## Result<sub>(2)</sub>a.Outcome indicators:

Compared with the same period of the previous year, BMI, blood pressure, and waistline Each of the **improvement rates** are 60.3%, 36.2%, and 45.1% in 2022, and 50.1%, 55.1%, and 45.7% in 2023.

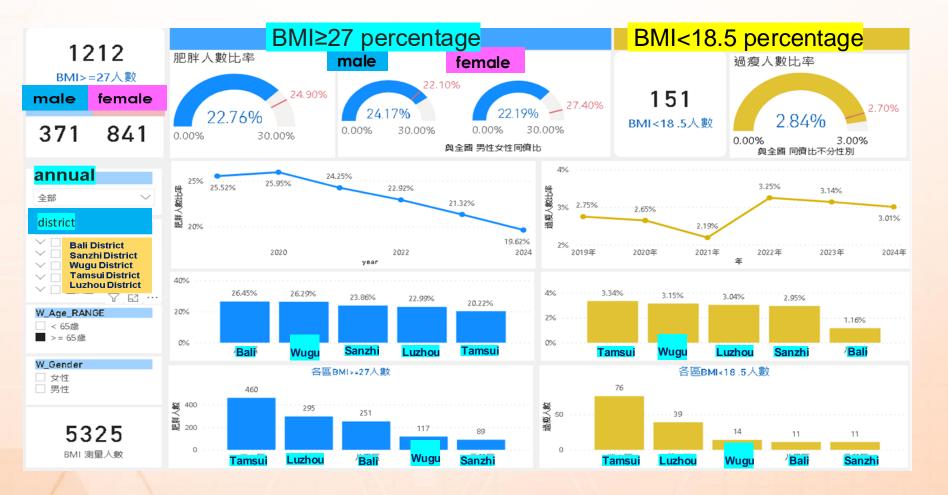

#### **Result**<sub>3</sub> b. Peer comparison indicators:

I. The proportion of people over 65 years old with BMI ≥ 27, **24.25%** in 2021, **22.92%** in 2022, **21.32%** in 2023.

II. The proportion of people over 65 years old with a BMI < 18.5, **2.19%** in 2021, **3.15%** in 2022, and **3.14%** in 2023.

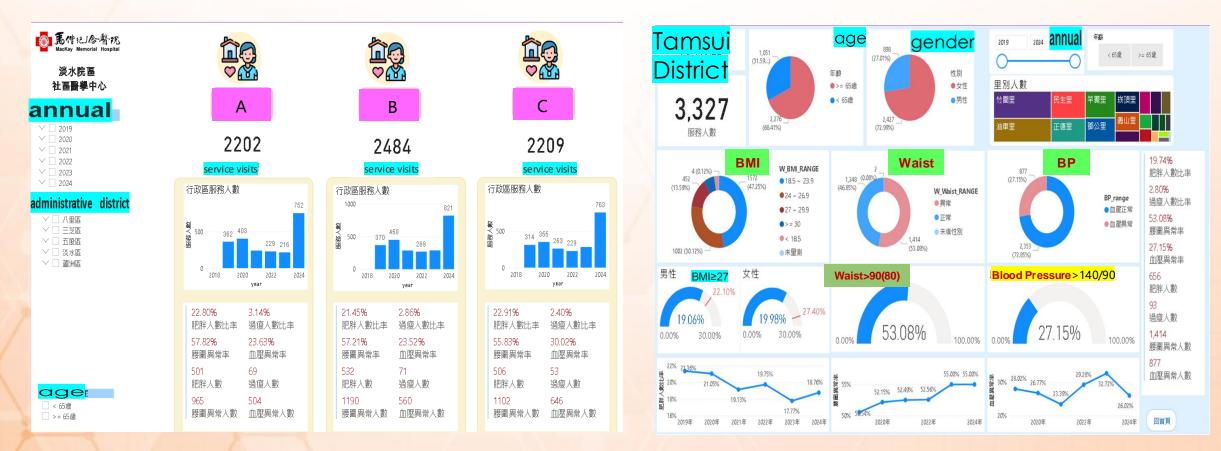

# Conclusion

Daily management indicators can be used as a reference of service volume for allocating nursing staff ; Health promotion effectiveness indicators are used as the outcome of team service.

# Thank you for your attention
